Criminalising Peacekeepers Jun 03 2020 This book examines Australia's and the United States' ability to prosecute their peacekeepers for sexual exploitation and abuse. The United Nations has too long been plagued by sexual exploitation and abuse in some of the world's most vulnerable communities. Discussion within

United Nations' reporting and academic scholarship focuses on policy; however, a significant concern outlined here is that peacekeepers are committing sexual offences with impunity, despite exclusive criminal jurisdiction over peacekeepers being granted to their sending states. In this original study O'Brien provides an in-depth, feminist analysis of US and Australian sexual offending law and jurisdiction over their military and military-civilian peacekeepers. Based on timely critical analysis, this book demonstrates the limitations states face in ensuring accountability for sexual exploitation and abuse by peacekeepers – a factor which directly contributes to ongoing commission of and impunity for such offences. Calling for a rights-based, transnational law response to these crimes, this engaging and thought-provoking work will appeal to international practitioners, governments, UN policy-makers, and scholars of international, military and criminal law.

Women Veterans Dec 22 2021 Women who fight in wars also have to fight for their right to do so. But what are the obstacles impeding their progress in achieving equal status as both active service members and as veterans? This book, written by a team of female veterans and military scholars, demonstrates the ways in which women service members and veterans experience a unique set of challenges when attempting to both honorably serve their country and reintegrate into civilian society following military service. These challenges include – but are not limited to – discrimination, staggering rates of suicide, and barriers to obtaining treatment for military sexual trauma and other critical benefits through the U.S. Department of Veterans Affairs. *Women Veterans: Lifting the Veil*

of Invisibility examines current service-related policies and gender in the military's hierarchical power structure. Here, a confluence of white male privilege and entitlement, the culture of domination, and the effeminization of the enemy manifest themselves as a backlash against women, calling into question a woman's agency and her very status as a citizen. Special attention in the book is paid to the civil-military divide, representative bureaucracy, and the function of the military and civilian justice systems. Moreover, the need for appropriate healthcare policies and structures is examined within a 'wicked problems' framework. The authors conclude that the responsibility for women veterans, and all veterans for that matter, must become a matter of compelling government interest. This ground-breaking book is required reading for practitioners of public policy and administration with an interest in military and veterans affairs, public health, NGOs and activist groups, as well as scholars of gender and public service, public personnel management, and nonprofit management.

The War Report Jun 23 2019 This is a comprehensive Report on every armed conflict which took place during 2012. It is the first of a new series of annual reports on armed conflicts across the globe, offering an unprecedented overview of the nature, range, and impact of these conflicts and the legal issues they create. In Part I the Report describes its criteria for the identification and classification of armed conflicts under international law, and the legal consequences that flow from this classification. It sets out a list of armed conflicts in 2012, categorising each as international, non-international, or a military occupation, with estimates of civilian and military casualties. In Part II, each of these conflicts are examined in more detail, with an overview of the belligerents, means and methods of warfare, the applicable treaties and rules, and any prosecutions for, investigations into, or robust allegations of war crimes. Part III of the Report provides detailed thematic analysis of key legal developments which arose in the context of these conflicts, allowing for a more in-depth reflection on cross-cutting questions and controversies. The topics under investigation in this Report include drone strikes, the use of explosive weapons, small arms, forced displacement of civilians, detention at Guantanamo Bay, and the enforcement of international humanitarian and criminal law in both national and international courts. The Report gives a full and accessible overview of armed conflicts in 2012. It should be the first port of call for everyone working in the field.

Handbook of Psychosocial Interventions for Veterans and

Service Members May 03 2020 The United States is in the midst of the largest military demobilization in its history. This is leading to an increase in the demand for mental health clinicians who can provide services to hundreds of thousands of military veterans and members of the military. Nearly two million Americans have been

deployed to the wars in the Middle East, and thousands of them have been deeply affected, either psychologically, physically, or both. Projections suggest that 300,000 are returning with symptoms of PTSD or major Depression; 320,000 have been exposed to probable Traumatic Brain Injuries; and hundreds of thousands are dealing with psychological effects of physical injuries. Other veterans and members of the military without injuries will seek treatment to help them with the psychological impact of serving in the military, being deployed, or transitioning and reintegrating back into the civilian world. As an example, hundreds of thousands of service members are also leaving the armed forces earlier than they anticipated and will need to quickly adjust to life as civilians after assuming that they would have many more years in the military. Many will be leaving the military because of demobilizations and downsizing due to budget cuts. Current proposed cuts will shrink the military force to the same size it was in 1940. The Pew Center reports that 44% of veterans from the current wars are describing their readjustment to civilian life as difficult, and many of them are and will be turning to civilian mental health and primary care clinicians for assistance. The Handbook of Psychosocial Interventions for Veterans and Service Members is a one stop handbook for non-military clinicians working with service members, veterans, and their families. It brings together experts from the Department of Defense, the Department of Veterans Affairs, veteran service organizations, and academia to create the first comprehensive guidebook for civilian clinicians. In addition to covering psychiatric disorders such as depression, anxiety, and PTSD, this book also offers information about psychosocial topics that impact military personnel and their loved ones and can become part of treatment (e.g., employment or education options, financial matters, and parenting concerns), providing the most recent and cutting-edge research on the topics. Chapters are concise and practical, delivering the key information necessary to orient

clinicians to the special needs of veterans and their families. The Handbook of Psychosocial Interventions for Veterans and Service Members is an essential resource for private practice mental health clinicians and primary care physicians, as well as a useful adjunct for VA and DOD psychologists and staff.

Equality Oct 20 2021 The essays in this volume on the subject of equality are the work of scholars at Bard College and West Point. Their research falls within the areas of history, religion, legal theory, social science, ethics and philosophy. The regions covered include the Middle and Far East, Europe, and America; the time periods studied are both contemporary and historical. Each essay is a well-detailed exploration which assumes the reader has no prior acquaintance with the topic. Together, the studies reveal both conflicting standards of equality as well as patterns of pernicious inequality. In an ideal world, equality and inequality among humans would vary in acceptable proportion, increase of the one ensuring decrease of the other. Unfortunately, as the studies illustrate, any such expectation of progress in the real world is almost routinely thwarted. Despite the wide variety of topics, a common thread binds these essays. Human nature seems to harbor a moral deficiency lying deeper than any written laws and those traditional customs which promote inequality and breed injustice. The fault is prominent in those who champion unjust laws or who willingly enforce discrimination but it is no less active in the silent many who condone the practice. The essays reveal the same persistent and unappealing trait which social groups from the remote past to the present manifest in various ways: blind determination to perpetuate whatever advantages one group believes it enjoys over another, convinced that its own members are more equal than theirs. Being made unequal, the others too easily become targets who are considered less worthy, sometimes even less human.

Media & Entertainment Law 2/e Jul 05 2020 Media and Entertainment Law presents a contemporary analysis of the law relating to the media and entertainment industry both in terms of its practical application and its theoretical framework. It provides a clear, current and comprehensive account of this exciting subject. Fully updated and revised, this second edition is one of the first texts to contain a full analysis of the Leveson Inquiry and the implications for our press and media that are arising from it. The new edition contains; a new chapter analysing the Defamation Act 2013; the Digital Economy Act 2010 which aimed to toughen up against copyright infringement online and has been subject to parliamentary review since coming into power; and the liability of internet service providers, including recent cases such as Tamiz vs Google 2012, which goes some way to define the extent to which an ISP may or may not be found liable for their bloggers content. With integrated coverage of Scots and Northern Irish law, Media and Entertainment Law also highlights comparisons with similar overseas jurisdictions, such as with the liability of ISPs where there are differences in both US and European law, in order to help students demonstrate an awareness of media laws, which may then influence UK legislation. Looking at key aspects such as TV and radio broadcasting, the print press, the music industry, online news and entertainment and social

networking sites, this text provides detailed coverage of the key principles, cases and legislation as well as a critical analysis of regulatory bodies such as OFCOM and the new regulator for the UK's newspapers and magazines (and online editions), the Independent Press Standards Organisation (Ips0). The text also provides the most comprehensive and up to date coverage of the law relating to Intellectual Property law for the entertainment industry with recent changes in EU law relating to performers' rights. Rules of Engagement and the International Law of Military Operations Aug 25 2019 The book systematically analyses the relationship and interaction between rules of engagement (ROE) and the legal framework regulating armed conflicts, both at the international and national levels. At the international level, the relationship between ROE and human rights law and international humanitarian law is explored. At the national level, the book relates ROE to (comparative) criminal law. A separate chapter analyses the complex relationship between self-defence law and rules of engagement. It is the first monograph to comprehensively examine these issues and to analyse how ROE interact with the various sources of the (international) law of military operations, both in terms of the law as a source for these rules and how the law is reflected and implemented through them. In doing so, and based on

the author's own experience, the book provides examples of how complicated, often controversial issues of law can be resolved while keeping the rules understandable at all levels of military operations. Aimed at both scholars and practitioners, the book provides a bridge between the academic world and the operational world. It provides new insights for both of those audiences in terms of understanding how the law applies to - and through - the rules on the use of force for military operations.

Court Martial May 15 2021 'They beat me,' whispers the artillery officer, 'Smashed my teeth in, sent an electric current through me. They want me to confess to something I never did.' Sven Hassel and his comrades are fighting on the Finnish front, facing an arctic winter more ferocious than anything they've ever known. But if they survive, they face shipment to Torgau Prison - the centre of Hitler's penal system - where deserters, convicts and anyone showing anti-Nazi sentiments are imprisoned and punished. This could mean arrest, court-martial and execution. Or it could mean torture and starvation. **COURT MARTIAL** is Sven Hassel's darkest novel and a shocking insight into the cruelty the Nazi regime inflicted on its own people.

The Shari'a and Islamic Criminal Justice in Time of War and Peace Jan 11 2021 This innovative and important book applies classical Sunni Muslim legal and religious doctrine to contemporary issues surrounding armed conflict. In doing so it shows that the shari'a and Islamic law are not only compatible with contemporary international human rights law and international humanitarian law norms, but are appropriate for use in Muslim societies. By grounding contemporary post-conflict processes and procedures in classical Muslim legal and religious doctrine, it becomes more accessible to Muslim societies who are looking for appropriate legal mechanisms to deal with the aftermath of armed conflict. This book uniquely presents a critique of the violent practices of contemporary Muslims and Muslim clerics who support these practices. It rebuts

Islamophobes in the West that discredit Islam on the basis of the abhorrent practices of some Muslims, and hopes to reduce tensions between Western and Islamic civilizations by enhancing common understanding of the issues.

Frontline Justice Aug 18 2021 Compared with its civilian counterpart - which struggles with delays and uncertain results - summary military justice is efficient. From offence until outcome, 90 per cent of cases are dealt with in less than ninety days. The other side of the coin is that there is no right to representation by defence counsel, no transcript produced, and no appeal to a judge. Nine times out of ten, individuals are found guilty. For service members, consequences can include fines, reductions in rank, confinement,

and sentences of up to thirty days in military jail, sometimes with a criminal conviction. Addressing important gaps in legal literature, *Frontline Justice* sets out to examine summary justice in Canada's military and to advocate for reform. Pascal Lévesque describes the origins, purposes, and features of the summary trial system in the Canadian Armed Forces. He then analyzes the system's benefits and flaws and the challenges it faces in maintaining discipline while respecting the Canadian Charter of Rights and Freedoms. Lévesque determines that troubling aspects of the system, including the fact that lower and higher ranks are dealt with and punished differently, are clear indicators of a need for change. Criticizing current legislation, the book takes into account the latest developments in military law and jurisprudence to make concrete recommendations for an alternative model of military justice. A thought-provoking and balanced analysis, *Frontline Justice* seeks to remedy some of the more unfair and arcane proceedings of the Canadian military's summary trial system.

WARRANT OFFICER BASIC COURSE (WOBC) 1-18

INFORMATION Congratulations on your selection as a Warrant Officer of Marines. You are about to embark upon a truly remarkable journey as an officer of Marines. That journey begins with your successful completion of the Warrant Officer Basic Course (WOBC) at The Basic School (TBS) in Quantico, Virginia.

Warrant Officers and Title 10: Warrant Officer (WO) is an appointed rank, vice a commissioned one. Chief Warrant Officers (Marine Gunners and Recruiting Officers) are commissioned. All Chief Warrant Officers and Warrant Officers must successfully complete the WOBC in order to retain their appointment or commission. Title 10 U.S.C. Section 1165 states: **THE SECRETARY OF THE NAVY HAS THE AUTHORITY TO TERMINATE THE REGULAR APPOINTMENT OF ANY PERMANENT REGULAR WO AT ANY TIME WITHIN THREE YEARS AFTER THE DATE WHEN THE OFFICER ACCEPTED HIS ORIGINAL PERMANENT APPOINTMENT. A MARINE WHOSE APPOINTMENT IS TERMINATED MAY, UPON HIS REQUEST AND AT THE DISCRETION OF THE SECRETARY OF THE NAVY, BE ENLISTED IN A GRADE NOT LOWER THAN THAT HELD IMMEDIATELY PRIOR TO APPOINTMENT. THEREFORE, THE FIRST THREE YEARS AS A WO IS A PROBATIONARY PERIOD AND THE APPOINTMENT TO WO WILL BE TERMINATED IF A MARINE DOES NOT COMPLETE THE REQUIREMENTS OF THE WOBC. WOBC MISSION STATEMENT: Train and educate newly appointed warrant officers in the high standards of professional knowledge esprit-de-corps, and leadership required to transition from enlisted Marine to officer with particular emphasis on the duties, responsibilities and warfighting skills required of a**

provisional rifle platoon commander. The Warrant Officer Basic Course: The WOBC is an eighteen-week course that focuses on the transition from enlisted Marine to Marine officer. TBS and the WOBC focus on five horizontal themes that define expectations of all Marine Officers: (1) a man/woman of exemplary character, (2) devoted to leading Marines 24/7, (3) able to decide, communicate, and act in the fog of war, (4) a Warfighter who embraces the Corps' warrior ethos, and (5) mentally strong and physically tough. The universal concept that Marine Officers must be able to assess situations, weigh the pros and cons of various decisions, make a decision, develop a plan, communicate that plan effectively, and supervise its execution is stressed and exercised throughout the course. The course will teach the science and art required for service of Marine Officers with an emphasis on decision making throughout. Provisional infantry and planning subjects are together used as the means or vehicle to teach and evaluate this process. Since all students are evaluated on leadership as Marine Officers; physical, mental, and emotional stress are incorporated throughout the course in order to evaluate the ability to lead in chaotic and stressful environments. Some individuals will be pushed close to their failing point, but the WOBC is designed to give students an opportunity to display positive leadership qualities in the face of adversity. The WOBC is not a "check in the block." It is a course designed to provide students with the learning experiences necessary to effectively transition to service as a Marine Officer. Students who do not successfully complete the course face a variety of administrative actions, including repetition of the course, recycle to a six month lieutenant Basic Officer Course, revocation of appointment, or separation from the service. The WOBC curriculum is an academically rigorous, provisional infantry and staff planning based program of instruction (POI) which consists of approximately 935 hours of formal instruction. The POI includes classroom instruction, field exercises, sand table exercises, and discussion

groups. Classroom instruction is designed around the flipped classroom model.

The Puritan Culture of America's Military Apr 25 2022 This book explores Puritanism and its continuing influence on U.S. and military law in the Global War on Terror, exploring connections between Puritanism and notions of responsibility in relation to military crimes, superstitious practices within the military, and urges for revenge. Engaging with the work of figures such as Durkheim, Fauconnet and Weber, it draws on primary data gathered through participation and observation at the U.S. Army courts-martial following events at Abu Ghraib, Operation Iron Triangle, the Baghdad canal killings and a war crimes case in Afghanistan, to show how Puritan cultural habits color and shape both American military actions and the ways in which these actions are perceived by the American public. A theoretically sophisticated examination of the cultural tendencies that shape military conduct and justice in the context of a contemporary global conflict, *The Puritan Culture of America's Military* will appeal to scholars across the social sciences with interests in social theory and sociology, cultural studies, politics and international relations and military studies.

Military Justice in the Modern Age Feb 09 2021 Military justice systems across the world are in a state of transition. These changes are due to a combination of both domestic and international legal pressures. The domestic influences include constitutional principles, bills of rights and the presence of increasingly strong oversight bodies such as parliamentary committees. Military justice has also come under pressure from international law, particularly when applied on operations. The common theme in these many different influences is the growing role of external legal principles and institutions on military justice. This book provides insights from both scholars and practitioners on reforms to military justice in

individual countries (including the UK, Canada, the Netherlands and Australia) and in wider regions (for example, South Asia and Latin America). It also analyses the impact of 'civilianisation', the changing nature of operations and the decisions of domestic and international courts on efforts to reform military justice.

2021 Over 700 total pages Introduction: Leadership has often been viewed as more of an art than a science. However, the expanding field of neuroscience is confirming that leadership may be more science than art. While the thinking components of the brain have been noticeably evolving along with the pace of technology, the emotional parts are still very primitive, yet play an important role in leadership and behavior. The latest neurological, psychological, and organizational research is converging towards the fact that emotional leadership is the key ingredient to an organization's performance. Successfully leading in dynamic, complex environments, making wise decisions while facing tremendous resource constraints, avoiding moral and ethical lapses, preventing failures in leadership, building healthy relationships, and fostering resiliency across the workforce is less about the hard skills of cognitive intelligence and more about the soft skills of emotional intelligence. Leaders still need foundational, cognitive skills, but they cannot lead solely from their intellect in today's interconnected world. Contains the following studies / publications: 1.
