[Alternative Water Supply Systems](#) Sep 17 2021 Owing to climate change related uncertainties and anticipated population growth, different parts of the developing and the developed world (particularly urban areas) are experiencing water shortages or flooding and security of fit-for-purpose supplies is becoming a major issue. The emphasis on decentralized alternative water supply systems has increased considerably. Most of the information on such systems is either scattered or focuses on large scale reuse with little consideration given to decentralized small to medium scale systems. Alternative Water Supply Systems brings together recent research into the available and innovative options and additionally shares experiences from a wide range of contexts from both developed and developing countries. Alternative Water Supply Systems covers technical, social, financial and institutional aspects associated with decentralized alternative water supply systems. These include systems for greywater recycling, rainwater harvesting, recovery of water through condensation and sewer mining. A number of case studies from the UK, the USA, Australia and the developing world are presented to discuss associated environmental and health implications. The book provides insights into a range of aspects associated with alternative water supply systems and an evidence base (through case studies) on potential water savings and trade-offs. The information organized in the book is aimed at facilitating wider uptake of context specific alternatives at a decentralized scale mainly in urban areas. This book is a key reference for postgraduate level students and researchers interested in environmental engineering, water resources management, urban planning and resource efficiency, water demand management, building service engineering and sustainable architecture. It provides practical insights for water professionals such as systems designers, operators, and decision makers responsible for planning and delivering sustainable water management in urban areas through the implementation of decentralized water recycling. [De tijdmachine](#) Dec 29 2019 In de reeks Klassieke Eversellers 'Er bestaat geen verschil tussen tijd en een der drie ruimtedimensies, behalve dat onze zintuiglijke

waarneming zich langs de tijd beweegt.' De Tijdreiziger De vader van de moderne Science Fiction is zonder twijfel de Engelse schrijver H.G. Wells (1866-1946). Zijn invloed, zowel ideologisch als literair, is aanzienlijk geweest, en hij behoort dan ook nog steeds tot een van de meest gelezen Science Fiction schrijvers. Wells schreef onder meer De tijdsmachine, De onzichtbare man en De oorlog der werelden. Hij schreef De tijdsmachine in 1895 waarna het boek driemaal is verfilmd. Het boek wordt door velen als een van de grote Science Fiction meesterwerken gezien en diende, en dient nog steeds, als belangrijke inspiratiebron voor veel andere schrijvers. In De tijdsmachine doet De Tijdreiziger zijn vrienden verslag van zijn verblijf in de verre toekomst, in het jaar 802.700. Hij beschrijft zijn kennismaking met de bovengronds levende Eloï en de lichtschuwe, ondergronds levende Morlocks. Langzaam maar zeker ontdekt hij de oorzaak van de angst waaraan de ogenschijnlijk zo gelukzalige Eloï iedere nacht ten prooi vallen.

**De geheime tuin** Jan 28 2020 Prachtige hervertelling van klassieker door Imme Dros. Vanaf 10 jaar. Mary staarde naar het roestige ding in haar handen. Een sleutel. 'Misschien lag hij daar wel tien jaar begraven,' fluisterde ze. 'Misschien is hij wel van de tuin!' Ze mocht overal komen, hadden ze gezegd, alleen niet in die ene kamer, en in die ene tuin. Maar Mary hoort geluiden, in de verboden kamer. Inbeelding, zeggen ze. En: verboden! Over de muur van de geheime tuin ziet Mary steeds dezelfde vogel vliegen. Mary houdt niet van verboden en ook niet van geheimen... Kan zij de geheimen ontrafelen? Tonke Dragt over De geheime tuin: 'Verrukkelijk boek - mijn lievelingsboek. De geheime tuin heeft alles: het is geheimzinnig, spannend en betoverend mooi! Een boek dat ieder kind gelezen moet hebben.' The Secret Garden van Frances Hodgson Burnett verscheen voor het eerst in 1911. Meer dan honderd jaar later is het verhaal over het stugge, egoïstische weesmeisje Mary dat een verboden, verwaarloosde tuin weer tot bloei weet te brengen - en daarmee zichzelf - nog altijd betoverend voor jong en oud. Prachtige vertelling waarin de parallellen tussen natuur, vriendschap en verbeelding onopvallend lijken, maar magisch zijn.

**Of Primary Importance** May 02 2020 From the first chapter of Ann Marie Corgill's Of Primary Importance you experience the swirling energy, the sights, and the sounds of a primary classroom. "Step inside" she says, "and breathe the writing workshop air with me. Take a look at a primary classroom, and take a minute to watch and listen and see real learning, real writing in action." Throughout these pages, you'll see Ann Marie guiding her primary students into deep and meaningful explorations of a wide variety of fiction and nonfiction. Watch as her classroom community progresses into eager and independent writers speaking with clarity, voice, and an undeniable understanding of the power and purposes of putting pen, pencil, crayon, and paper to work! Forming the heart of the book are detailed units of study on poetry, nonfiction, and fiction writing that provide a clear demonstration of the writing workshop process at work throughout a school year. You'll also find examples of favorite texts for teaching various craft components, ideas for classroom organization and where to purchase materials, suggestions for publishing student work, lists of professional resources and, most importantly, inspiring examples of what children who are empowered to write can and will write. Of Primary Importance is not a how-to manual as much as it is a celebration of the idiosyncratic journey of teaching young children to write. If you are a grade-one through grade-three teacher struggling to get your students writing well, if you want to push your writing workshop to new dimensions, or if you are just plain skeptical that primary kids can write something beyond "I love my mom. I love my dog. The end," this book is for you. You will come away inspired, challenged, supported, and wiser in your classroom writing instruction.

**Including Families of Children with Special Needs** Dec 09 2020 More than 6.5 million children in the US receive special education services; in any given community, approximately one child out of every six will get speech therapy, go to counseling, attend classes exclusively with other children with disabilities, or receive some other service that allows him or her to learn. This new revised edition is a step-by-step guide to serving children and youth with disabilities as well as the family members, caregivers, and other people involved in their lives. The authors show how staff can enable full use of the library's resources by integrating the methods of educators, medical and psychological therapists, social workers, librarians, parents, and other caregivers. Widening the scope to address the needs of teens as well as preschool and school-age children, this edition also discusses the needs of Spanish-speaking children with disabilities and their families, looking at cultural competency as well as Spanish-language resources. Enhanced with checklists, stories based on real experiences, descriptions of model programs and resources, and an overview of appropriate internet sites and services, this how-to gives thorough consideration to Partnering and collaborating with parents and other professionals. Developing special collections and resources Assessing competencies and skills Principles underlying family-centered services and resource-based practices The interrelationship of early intervention, special education, and library service This manual will prove valuable not only to children's services librarians, outreach librarians, and library administrators, but also early intervention and family support professionals, early childhood and special educators, childcare workers, daycare and after school program providers, and policymakers.

**Encyclopedia of the Anthropocene** Nov 19 2021 Encyclopedia of the Anthropocene presents a currency-based, global synthesis cataloguing the impact of humanity's global ecological footprint. Covering a multitude of aspects related to Climate Change, Biodiversity, Contaminants, Geological, Energy and Ethics, leading scientists provide foundational essays that enable researchers to define and scrutinize information, ideas, relationships, meanings and ideas within the Anthropocene concept. Questions widely debated among scientists, humanists, conservationists, politicians and others are included, providing discussion on when the Anthropocene began, what to call it, whether it should be considered an official geological epoch, whether it can be contained in time, and how it will affect future generations. Although the idea that humanity has driven the planet into a new geological epoch has been around since the dawn of the 20th century, the term 'Anthropocene' was only first used by ecologist Eugene Stoermer in the 1980s, and hence popularized in its current meaning by atmospheric chemist Paul Crutzen in 2000. Presents comprehensive and systematic coverage of topics related to the Anthropocene, with a focus on the Geosciences and Environmental science Includes point-counterpoint articles debating key aspects of the Anthropocene, giving users an even-handed navigation of this complex area Provides historic, seminal papers and essays from leading scientists and philosophers who demonstrate changes in the Anthropocene concept over time

**Caring for Corporate Sustainability** Feb 08 2021 Corporate sustainability comes in a variety of shapes and the boundaries defining what can be called sustainability are disputed. This thesis explores the making of sustainability at a medium-sized company in Sweden, in this study called HygieneTech, that actively works with sustainability. Inspired by theories from science and technology studies (STS), the author discusses how different versions of sustainability are created in practices. The study is based on a theoretical approach, actor network theory (ANT), which understands reality as performed rather than observed, and since reality and its objects are enacted differently in diverse situations, reality and objects are considered multiple. Moreover, inspired by Maria Puig de la Bellacasa, "thinking with care" enables the study to tell new stories about how companies work with sustainability. This view of the actors as doing sustainability through care practice in a corporate setting paves the way for a caring analysis, exploring the different versions of sustainability as different matters of care. The enactment of sustainability is studied through participant observation, interviews and document studies. The most frequently enacted versions of sustainability are sustainability as saving resources, sustainability through standards/labels, sustainability as caring for people, and sustainability as a conscious choice. The study shows how some versions of sustainability in one setting can clash, such as when the employees at HygieneTech have to decide between caring for saving resources or caring for labelled products. Even so, in other settings versions of sustainability can be added together and thus enable the employees to care for sustainability both as a marketing device and as a conscious choice. Furthermore, the thesis shows that sustainability is sometimes made absent in relation to other matters of care, such as cleanliness and economy, while in other settings economy and sustainability can be added together. Finally, the thesis shows how sustainability, while enacted in several versions, still can cohere through professional tinkering. Hur företag arbetar med hållbarhetsfrågor kan se väldigt olika ut och många gånger uppstår stridigheter kring vad som får kallas hållbart. Denna avhandling studerar hur hållbarhet iscensätts i ett medelstort företag i Sverige som arbetar aktivt med hållbarhetsfrågor. Företaget är i denna studie anonymiserat och kallas HygieneTech. Genom att använda teorier från studier av teknik och vetenskap (STS) studeras hur olika versioner av hållbarhet skapas i olika praktiker. Studien utgår från ett teoretiskt angreppssätt, aktör-nätverksteori (ANT), som genom en symmetrisk analys studerar såväl materiella som mänskliga aktörer. ANT anser att verkligheten och dess objekt görs snarare än upplevs och eftersom verkligheten iscensätts på olika sätt i olika situationer, är verkligheten och objekten multipla. Genom att studera hållbarhet som omsorgspraktiker, inspirerad av Maria Puig de la Bellacasa, skriv nya typer av historier kring hållbarhetsarbete på företaget. Att tänka med omsorg ("thinking with care") ger forskaren möjlighet att istället för att återberätta den traditionellt återkommande historien om företaget som en vinstmaximerande rationell agent, lägga fokus inte bara på rationalitet, utan även affektion. Hur hållbarhet görs i praktiken studeras genom deltagande observationer, intervjuer samt dokumentstudier. Denna avhandling visar på att det finns ett flertal olika versioner av hållbarhet som iscensätts vilka ofta är sammanknutna i varandra. Några av de viktigaste versionerna av hållbarhet i HygieneTech handlar om hållbarhet genom att spara resurser, hållbarhet genom märkningar/standarder, hållbarhet genom omsorg om människor och hållbarhet som ett medvetet val. Vissa av dessa versioner kan adderas samman, men i andra situationer ställs de mot varandra. Studien diskuterar även exempel på när hållbarhet görs osynligt på grund av att andra värden såsom renlighet och ekonomi istället sätts i fokus, samt hur hållbarhet trots sina olika versioner hålls samman.

**Strangers in Their Own Land** Mar 12 2021 The National Book Award Finalist and New York Times bestseller that became a guide and balm for a country struggling to understand the election of Donald Trump "A generous but disconcerting look at the Tea Party. . . . This is a smart, respectful and compelling book." -Jason DeParle, The New York Times Book Review When Donald Trump won the 2016 presidential election, a bewildered nation turned to Strangers in Their Own Land to understand what Trump voters were thinking when they cast their ballots. Arlie Hochschild, one of the most influential sociologists of her generation, had spent the preceding five years immersed in the community around Lake Charles, Louisiana, a Tea Party stronghold. As Jedediah Purdy put it in the New Republic, "Hochschild is fascinated by how people make sense of their lives. . . . [Her] attentive, detailed portraits . . . reveal a gulf between Hochschild's 'strangers in their own land' and a new elite." Already a favorite common read book in communities and on campuses across the country and called "humble and important" by David Brooks and "masterly" by Atul Gawande, Hochschild's book has been lauded by Noam Chomsky, New Orleans mayor Mitch Landrieu, and countless others. The paperback edition features a new afterword by the author reflecting on the election of Donald Trump and the other events that have unfolded both in Louisiana and around the country since the hardcover edition was published, and also includes a readers' group guide at the back of the book.
